

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-3. (Canceled)

4. (Previously presented) An insulator capacitance analyzer for analyzing C-V characteristics of a first MIS structure having unknown capacitance, comprising:

a capacitance structure having known capacitance and configured so as to be serially connectable to the first MIS structure;

a measuring section for measuring synthesis capacitance of the serially-connected first MIS structure and capacitance structure;

a plurality of capacitance structures each having known capacitance and configured so as to be serially connectable to the first MIS structure; and

a switch for selecting one of the plurality of capacitance structures as the capacitance structure.

5-9. (Canceled)

10. (Previously presented) An insulator capacitance analyzer for analyzing C-V characteristics of a first MIS (Metal/Insulator/Semiconductor) structure, comprising:

a capacitance structure having a known capacitance and serially connected to the first MIS structure;

a measuring section for measuring a synthesis capacitance of the serially-connected first MIS structure and the capacitance structure; and

a plurality of capacitance structures each having known capacitance and configured so as to be serially connectable to the first MIS structure; and a switch for selecting one of the plurality of capacitance structures as the capacitance structure.
